FVI
Missions

• Mobilisation of expertise: Alone or within consortium, in various and complementary fields. Responses to calls for tender. Project engineering. Establishment of short and long term missions

• Training for students and professionals from both southern and northern countries regarding farming and animal production in warm climates but also training sessions on veterinary public health, in particular in the context of a mixed-team FVI/Cirad

• Mandated by the European Commission, FVI is the official operator of the ministry in charge of agriculture, responsible for institutional twinning programmes concerning veterinary public health

Goals

• Federating, coordinating and promoting France’s training and technical cooperation programmes to meet the demand for international expertise

• To facilitate the mobilisation of French expertise in veterinary public and promote the national and European governance model

• To contribute to the development of our foreign partners by strengthening their capacities

• FVI contributes to the implementation of the “international strategic plan” of the Ministry of agriculture and promotes OIE standards
Governance – Organization

• FVI has offices in Paris and Montpellier and our Head Office is located in Lyon. We are a small dynamic proactive team

• Charter codifying work practices and methods between members

• Non-profit organization
  
  **Governing bodies**
  General Assembly - Management Board

  **Control authorities**
  Public accounting officer – Government commissioner – Economic and financial controller

Context and History

• Need to strengthen the national veterinary services and, more extensively, to improve veterinary sanitary governance on an international scale, due to cross-border sanitary challenges

• FVI was founded in 2002 to address the increasing need and demand for veterinary cooperation

• FVI works in collaboration with French public operators promoting international expertise in various fields (agriculture, police, justice, finance, education, health....)
French agronomic research centre for international development
Research, expertise and training in animal production and health, including interactions between wildlife, livestock, and environment, to improve food security and public health in the southern countries.

FVI, grouping French public and private sector organizations, in various fields of veterinary public health
